Important Public Information Alert for Port St. Lucie Residents

It has been brought to the attention of the Utility Systems Department that individuals who are not city employees may be contacting residents and requesting to perform water quality testing on behalf of the City. In some cases these individuals have informed residents that they need to purchase expensive equipment due to unsatisfactory water quality results.

Please be advised that we have **not hired any individuals nor contracted with any private firms to do water quality testing for us.**

The City of Port St. Lucie routinely performs water quality testing on our water distribution system. City employees who perform these tests wear City issued uniforms, carry photo ID cards, and drive vehicles that are clearly marked as belonging to the City.

If you or someone you know are contacted by anyone claiming to be acting on the City's behalf, please immediately contact the Utility Systems Department by calling our 24-hour service line.

For more information regarding this matter, please contact the Utility Systems Department at (772) 873-6400.
